

## The 4th Of July 2023

Normally UFOs like to hang around the 4th of July celebrations in my location at 43015. 2023 was no exception to that rule of mine. I wasn't quick enough. I wasn't able to get close up details of the many Morphing UFO crafts on video. There were too many flying around. Too vast of a group to focus on for a very old hippy like me to cope with. I regret not having some great musicians around to confirm the event. But to my naked eye I can say these daredevil planes change shape, colors and movement. It was hard to see them morph to the naked eye. So what I got on the camcorder is unedited and in real time. Also the details don't seem to fit with the UFO planes. Most of the time they like to pass themselves off as small airplanes. A few times they even wave at me from the cockpit. They looked like 1943 RAF bomber Pilots. The major "tell" for me, besides telepathic contact, is that they fly way too close to the action and almost always at about 50 feet which I think may have violate Federal Aviation Administration Safety Rules. Some say these are drones. I can rule it out! But the feeling at the time did not up with visuals. The feelings were very profound. Kind of like being at church on Sundays for communion. All I can say was it a batch of joyful ET flying into the fireworks. There must have been 50 or 60 firework locations in 43015. Tons of ETs. As far as the eye could see. But I have been experiencing strange events long before commercial drone retail shipments from Amazon were available, in 2013 . One mystery I can attest to is that the ETs are very sneaky!
